UNIVERSITY®**

CAREER SERVICES

On Campus Graduate Report 2025

Methodology

This report includes LeTourneau University traditional graduates with May, August, and December 2025 graduation dates. The data in this report are based on survey information received through multiple sources. Students were asked to self-report post-graduation activities through the following methods.

- First Destination Survey was sent out via Handshake prior to graduation and followed up with a Microsoft Forms survey after graduation
- Online graduation surveys administered at the end of the final semester of enrollment

Faculty and staff were asked to assist in gathering information related to graduates who had not reported their activity. The Career Services office followed up with graduates by LinkedIn, social media, email, text, and phone calls.

Percentages of placement are based on graduates reporting that they secured desired employment. For example, graduates choosing full-time parenting over work outside the home are not calculated in the percentage placed. Additionally, students employed outside of their field of study by choice were considered placed.

Highlights

- 98% of graduates were tracked as a result of the efforts made
- 96% were employed in their field, furthering their education, or both

- 16% chose to further their education through graduate school

Employment/Education

- 2025 graduates by more than 175 individual employers
- 2025 graduates continuing education at more than 19 universities
- Working or studying in 19 states and 5 countries
